

Coronavirus Research Tools

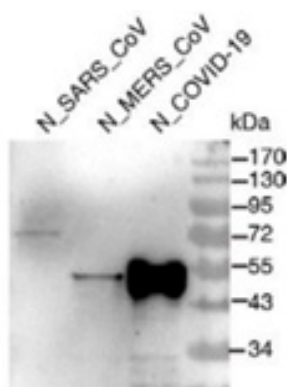

- Assay Kits, ELISA, Proteins, Antibodies & Anti-viral Agents Available
- Specific to SARS-CoV-2, SARS, MERS
- Bulk Quotes Available
- Ready to Ship Worldwide

Coronaviruses are large, enveloped, non-segmented positive-sense RNA viruses that are known to affect humans, mammals and birds. Recently scientists discovered a novel strain of Coronavirus that caused massive viral outbreak in China. This virus is more deadly than SARS-CoV and MERS-CoV combined, and is named as SARS-CoV-2 (previously, COVID-19). Due to limited information regarding the role of the SARS-CoV-2 proteins in viral pathogenesis and replication, not many treatment options are available. Additionally, there are limited research tools available in the market. BioVision is pleased to announce the launch of Coronavirus antibodies, proteins, kits and antiviral agents, the first in the market for Coronavirus research. These research products can detect SARS-CoV-2, SARS and MERS Coronaviruses.

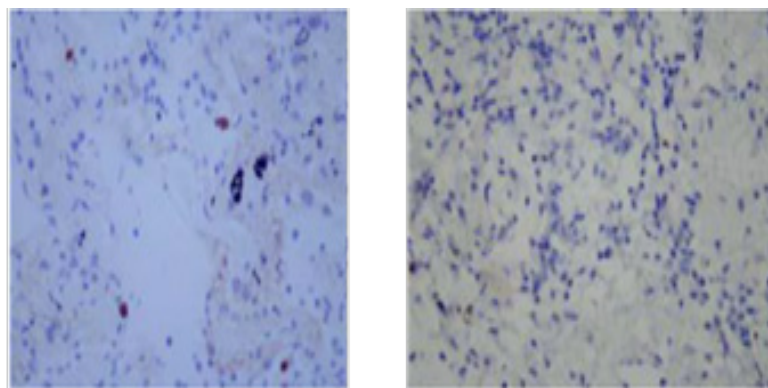

Key Features:

- Assay Kits, ELISA, Proteins, Antibodies & Anti-viral Agents Available
- Specific to SARS-CoV-2 SARS, MERS
