

QuickDetect™ Rapid ELISA Kits

ELISA (Enzyme-linked immunosorbent assay) kit is a simple and cost-effective method for detecting and quantifying an antigen in various samples such as serum, plasma, cell culture and other biological fluids. While many traditional ELISA kits may take up to 3 hours, BioVision's QuickDetect™ ELISA kits can be completed in less than 90 minutes with fewer incubation and wash steps, resulting in fewer errors and more consistent results.

Key Features:

- **Rapid & Simple:** Complete assays in 90 minutes with fewer incubation and wash steps
- **Accurate:** Sandwich format provide low intra & inter assay variability
- **High Sensitivity & Specificity**
- **Versatile:** Broad range of sample types including serum, plasma, cell culture supernatant & other bio fluids
- **Convenient:** No special handling or disposal required
